# Save More Than 50% Off Your Monthly Fax Line Charges!

## Boost Productivity, Increase Fax Security, and Reduce Costs with Fax2Mail!

Experts agree, Fax2Mail provides a cost effective solution for small and medium-size organizations that want to manage fax documents electronically. Whether you work in an office, on the road or maintain the company's business equipment, you may have experienced many of the challenges of using fax technology -- Stacks of paper to sort through, lost documents, busy signals, confidential information getting in the wrong hands, or equipment downtimes. *What if there was a solution that would enable you to send and receive business critical information when you need it and where you need it?*

- ü No software or hardware to purchase or load on your clients, PCs, or servers
- ü Secure Fax services for highest level fax document security
- ü Never busy, inbound fax reception
- ü Keep your existing fax number, sign up for a new local number, or use our Toll Free Fax Numbers at no additional charge

Users can send, receive, save, file, forward, and track faxes in seconds--right from their desktops. Work is accomplished faster, with added security and total reliability. Fax2Mail works with our clients' existing platforms for Internet access and email. Traffic is forwarded through Premiere Global's high-speed, high-volume global network with total transparency to the end-users.

To send faxes, virtually all common document files, spreadsheets, and graphic images are automatically converted to outbound faxes. When a user receives a fax, Fax2Mail automatically forwards it to the assigned user's email box as an Adobe® PDF or TIFF attachment with notification in the subject line.

Clients maintain total control over administration of their accounts through a secure Web interface including user registration, coversheet/email design, billing, and delivery report options. Fax2Mail provides local or toll-free inbound numbers, or clients may also route existing fax numbers through our system. Faxes are automatically stored on our system for 30 days for proof of delivery and backup.
