

ZENPRISE® SECURITY MANAGER

SAFEGUARD YOUR COMPANY WITH MOBILE SECURITY & COMPLIANCE

Companies are deploying more smartphones every year to meet the growing demand for mobile access to applications, services and data. It's a perfect storm that can threaten corporate security and compliance and take a bite out of bottom line profits. Because Security Manager seamlessly extends the Zenprise MobileManager™ platform, you have the power to maintain 100% compliance with corporate security policies across your enterprise infrastructure, devices and applications.

View users who have not set a password for their device.

ENFORCE COMPLIANCE, MITIGATE RISK

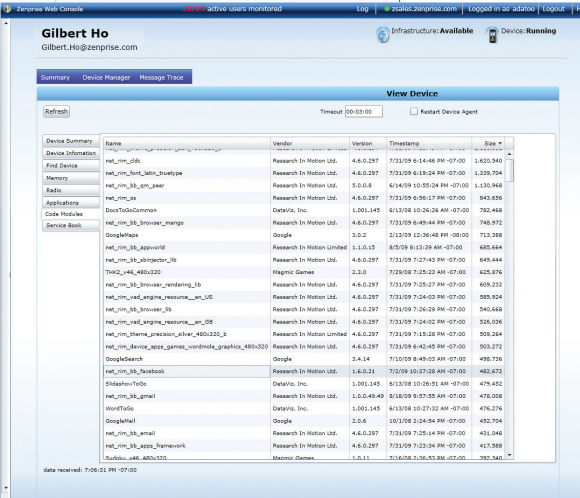

Zenprise Security Manager provides a mobile device auditor feature to help you enforce compliance of corporate policies through real-time device introspection. Ensure that all smartphones are running only the latest software patches and firmware. Protect working mobile assets and prevent security breaches by validating that only company-approved applications and functions are available to your smartphone users. By upholding policies, enforcing passwords, enabling content encryption, and disabling Bluetooth or camera features, you can mitigate risk and protect your company from non-compliance penalties.

AUTOMATED ALERTS AND REPORTING

Zenprise sends detailed real-time notifications of potential security anomalies. For example, IT receives instant notifications when non-compliant smartphones are accessing the network, thereby enabling your team to remedy a potential security problem without delay. Zenprise also helps you document compliance issues. With historical reports, you can spot trends in overall device-level compliance so your teams can collaborate to achieve risk-free enterprise mobility.

REMOTE WIPE AND LOCK

When smartphones are MIA, Zenprise gives you the ability to respond proactively to avert potential corporate data breaches. Support teams can remotely wipe smartphones clean of corporate data and lock-down devices to prohibit unauthorized use. With Zenprise, the process is quick and easy.
