| 3/4

Whether you work in an office, on the road or maintain the company's business equipment, you may have experienced many of the challenges of using fax technology—Stacks of paper to sort through, busy signals, confidential information getting in the wrong hands, or equipment downtimes. What if there was a solution that would enable you to send and receive business critical information when you need it and where you need it?

Fax2Mail speeds and simplifies business communications by:

- § Allowing you to send, receive, save and forward faxes from wherever you are
- § Automatically converting documents to Adobe PDF or TIFF format
- § Integrating with existing email platforms
- § Enabling you to use new or existing fax numbers
- § Providing account administration through a secure web interface

Providing companies with:

- § Increased Productivity
- § Greater Security
- § Cost Savings
- § Added Convenience
- § Document Flexibility
- § Comprehensive Reporting
- § Total User Control

Who uses Fax2Mail?

- § Single Users
- § Small and Medium Size Businesses
- § Enterprise Organizations with Multiple Offices & Mobile Workers Worldwide

Fax2Mail Desktop Fax Solution

As a global leader and pioneer in messaging solutions, Premiere Global Services is uniquely positioned to help customers automate and manage the entire process of message delivery. The Fax2Mail solution, enables our customers to combine the best features of fax technology and the convenience of email into one powerful, easy to use tool. As a result, our customers are able to improve communications, increase productivity and lower costs.

How Fax2Mail Works

Users can send, receive, save, file, forward and track faxes in seconds—right from their desktops. Work is accomplished faster, with added security and total reliability. Fax2Mail works with our clients' existing platforms for Internet access and email. Traffic is

forwarded through Premiere Global's high-speed, high volume global network with total transparency to end-users. To send faxes, virtually all common document files, spreadsheets and graphic image files are automatically converted to outbound faxes. When a user receives a fax, Fax2Mail automatically forwards it to the assigned user's email box as an Adobe® PDF or TIFF attachment with notification in the subject line. Clients maintain total control over administration of their accounts through a secure Web interface including user registration, fax coversheet design, billing and delivery report options. Fax2Mail provides local or toll-free inbound numbers or clients may also route existing fax numbers through our system. Faxes are automatically stored on our system for 30 days for proof of delivery and backup.

Boost Productivity, Increase Fax Security, and Reduce Costs with Fax2Mail & eTransaction!

Use a single solution, or bundle services for your Mobile Users or the Enterprise

Fax2Mail Desktop Fax Service

For single users, groups, departmental, line of business, and small to medium size businesses. Allows customers to bill their monthly fee and usage charges to a credit card. Inbound and outbound faxing is done right from the user's desktop using their existing email client, no software to install. Great for mobile sales representatives and executives!

Secure Fax2Mail Service

Need to meet HIPAA and SOX compliance requirements? Our Secure Fax2Mail fax service provides the same great Fax2Mail fax service from Premiere Global Services, but is customized to provide the highest level of document delivery security from our network to yours. This service is SAS70 compliant and is very inexpensive and easy to configure and implement.

Fax2Mail for Domains

Have a call center or customer service department that needs group inbound and outbound faxing? Our Domain Level Fax2Mail fax service provides a one-to-many fax number configuration of the Fax2Mail fax service. Inbound faxes are routed to either group email inbox or a public folder; where CSRs can access and act on faxes without having to leave their stations. Outbound faxing is done from directly from their existing email client, again agents never have to print a document and walk it over to the fax machine.

PrintAnywhere for the BlackBerry

Premiere Global Services has created a PremiereAnywhere application that you can download directly to your BlackBerry PDA. Simply go to our website, download the BlackBerry software application, and you're ready to begin. Once installed, select any email message to open the options menu. Select the PremiereAnywhere feature, enter the number of the fax machine where you want your file to print, and within minutes your document will be printed and ready for viewing forwarded through Premiere Global's high-speed, high volume global network with total transparency to end-users. To send faxes, virtually all common document files, spreadsheets and graphic image files are automatically converted to outbound faxes. When a user receives a fax, Fax2Mail automatically forwards it to the assigned user's email box as an Adobe® PDF or TIFF attachment with notification in the subject line. Great for mobile sales representatives and executives!

eTransaction Fax2Mail Service

Eliminate paper statements and transactional documents with Premiere Global's eTransaction delivery service. With eTransaction, you can simplify and quickly deliver critical business documents and communications without disrupting existing processes or systems. eTransaction reduces the cost of generating and managing paper documents, including:

- Work orders
- Account statements
- Invoices
- Purchase orders
- Order acknowledgements
- Invoices or purchase orders
- Financial reports and statements
- Trade confirmations

eTransaction Features Include

- Personalization - documents can be customized to the needs of your clients or individual accounts
- Multiple Format Delivery Modes – documents can be sent as an encrypted email, a fax, or securely over the web
- Document Security - sensitive data can be delivered securely through Premiere's patented technology

Eliminate paper statements with Premiere Global's paperless statement presentation and delivery solutions:

- Save tens of thousands or hundreds of thousands of dollars by diminishing paper, processing and postage
- Give your customers instant, anytime access to their statements the way they want them delivered— via fax, on the Web or in their email
- Deliver and track secure statements to your customers, as required by the Gramm Leach Bliley Act and other regulatory guidelines
- Better serve your customers by enabling them to sort statements by transaction type, date or payment amounts
- Market and sell new products to existing customers with integrated marketing messages and links
